PROFESSIONAL SUMMARY

Full-Stack Developer focused on Python, Django, JavaScript, and web application development, with hands-on experience building software for real operational environments. Experienced in developing internal management systems and maintaining production websites.

TECHNICAL SKILLS

Programming

Python, JavaScript

Frontend

HTML5, CSS3, JavaScript, Responsive Web Design

Tools

Git, GitHub, VS Code, Cursor

Backend

Django, Node.js

Database

SQLite

Currently Expanding

NumPy, Pandas, Data Analysis, Machine Learning

PROFESSIONAL EXPERIENCE

Software Development & Website Management

Chahardangeh 24-Hour Clinic

Current

Developed SafeHands, an internal accounting and inventory management system, while also managing and improving the clinic's website.

- Developed SafeHands for internal operational use
- Built financial and inventory management workflows
- Manage and maintain the clinic's website

EDUCATION

Bachelor of Computer Science

In Progress

Azad University — Tehran Central Branch · Oct 2024 – Present

Building a foundation in computer science, programming, algorithms, and software development.

TECHNICAL TRAINING

Full-Stack Web Development

Tehran Institute of Technology — Niavaran Branch

HTML, JavaScript, Node.js

Jan 2025 – May 2025

Advanced Python

Tehran Institute of Technology

Python, Problem Solving, Programming

May 2024 – Nov 2024

Programming with Python

Tehran Institute of Technology

Python, Programming, Problem Solving

Jan 2024 – Apr 2024

Algorithms

Tehran Institute of Technology

Algorithms, Python, Problem Solving

Nov 2023 – Jan 2024

SafeHands

Accounting & Inventory Management System

A REAL-WORLD APPLICATION DEVELOPED FOR INTERNAL OPERATIONAL USE.

SafeHands is a full-stack accounting and inventory management system developed for Chahardangeh 24-Hour Clinic. It supports daily financial records, transaction tracking, inventory management, and role-based workflows through separate admin and personnel interfaces.

Key Features

- Admin & personnel panels
- Financial record management
- Cash & card transaction tracking
- Record approval & locking
- Inventory management
- Role-based access

Technologies

Python

Django

SQLite

HTML

CSS

JavaScript

Application Interfaces
